

# CLOUD COMPUTING TENDANCES & OPPORTUNITÉS

MOS 4.4 – NTIC

Moncef EL KARMOUDI

07 février 2020

Tuteur : Mr. Emmanuel DELLANDREA

# PLAN DE LA PRÉSENTATION

I. Introduction au Cloud Computing

II. Le « Serverless »

III. Méthodes et outils de veille

IV. Conclusion

# I. INTRODUCTION AU CLOUD COMPUTING

# INTRODUCTION AU CLOUD COMPUTING

Expectation

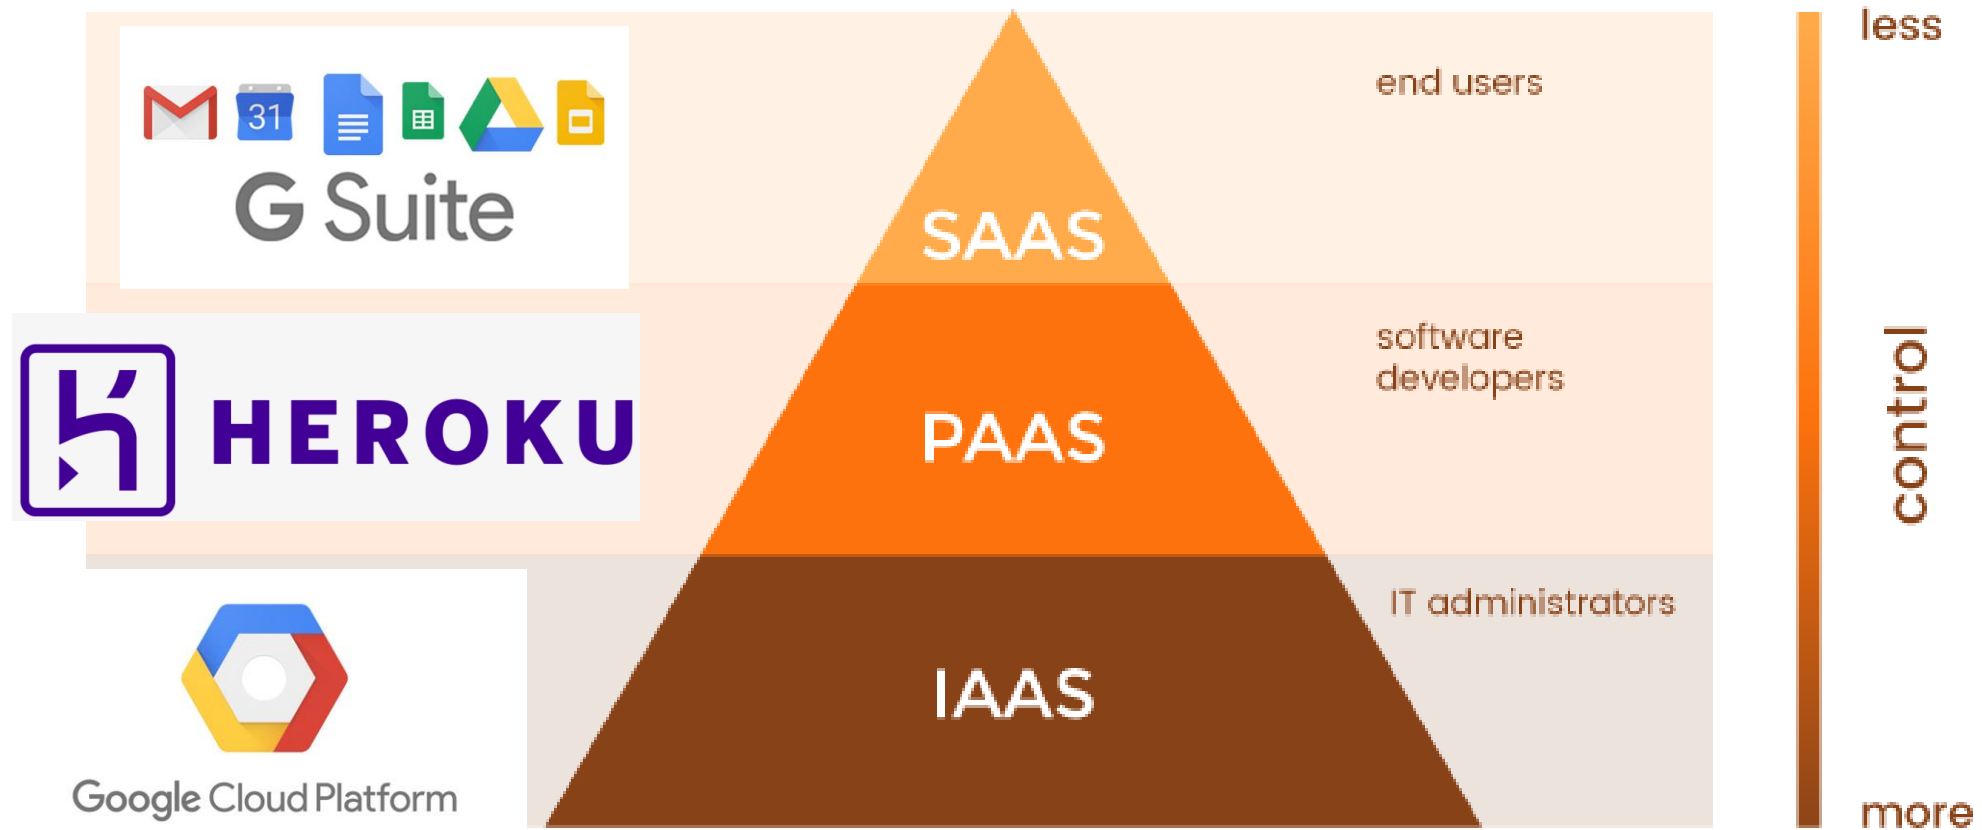

Reality

# CARACTÉRISTIQUES D'UN SERVICE CLOUD

1. Service à la demande (performance)
2. Service mesurable (facturation)
3. Mutualisation des ressources (partage)
4. Elasticité des ressources (montée de charge)

# INFRASTRUCTURE / PLATFORM / SOFTWARE AS A SERVICE

## II. LE SERVERLESS

# MODÈLE DE CLOUD COMPUTING

## Serverless

≠ « Sans serveur »

= « Sans **se soucier du** serveur »

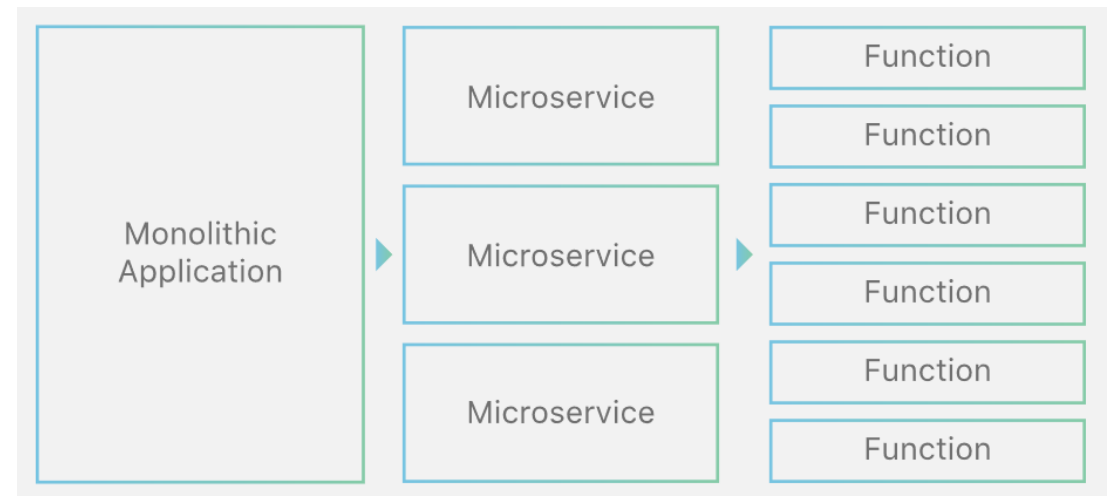

In this animation, Network World explains some of the concepts of serverless computing, and how it represents the next phase of cloud computing for Internet of Things applications and products.

[Serverless explainer: The next generation of cloud infrastructure](#), NETWORK WORLD

# FUNCTION AS A SERVICE - FAAS

FaaS (Function-as-a-Service) permet l'exécution de code en réponse à des événements sans infrastructure complexe typiquement associée aux applications reposant sur une architecture microservices.

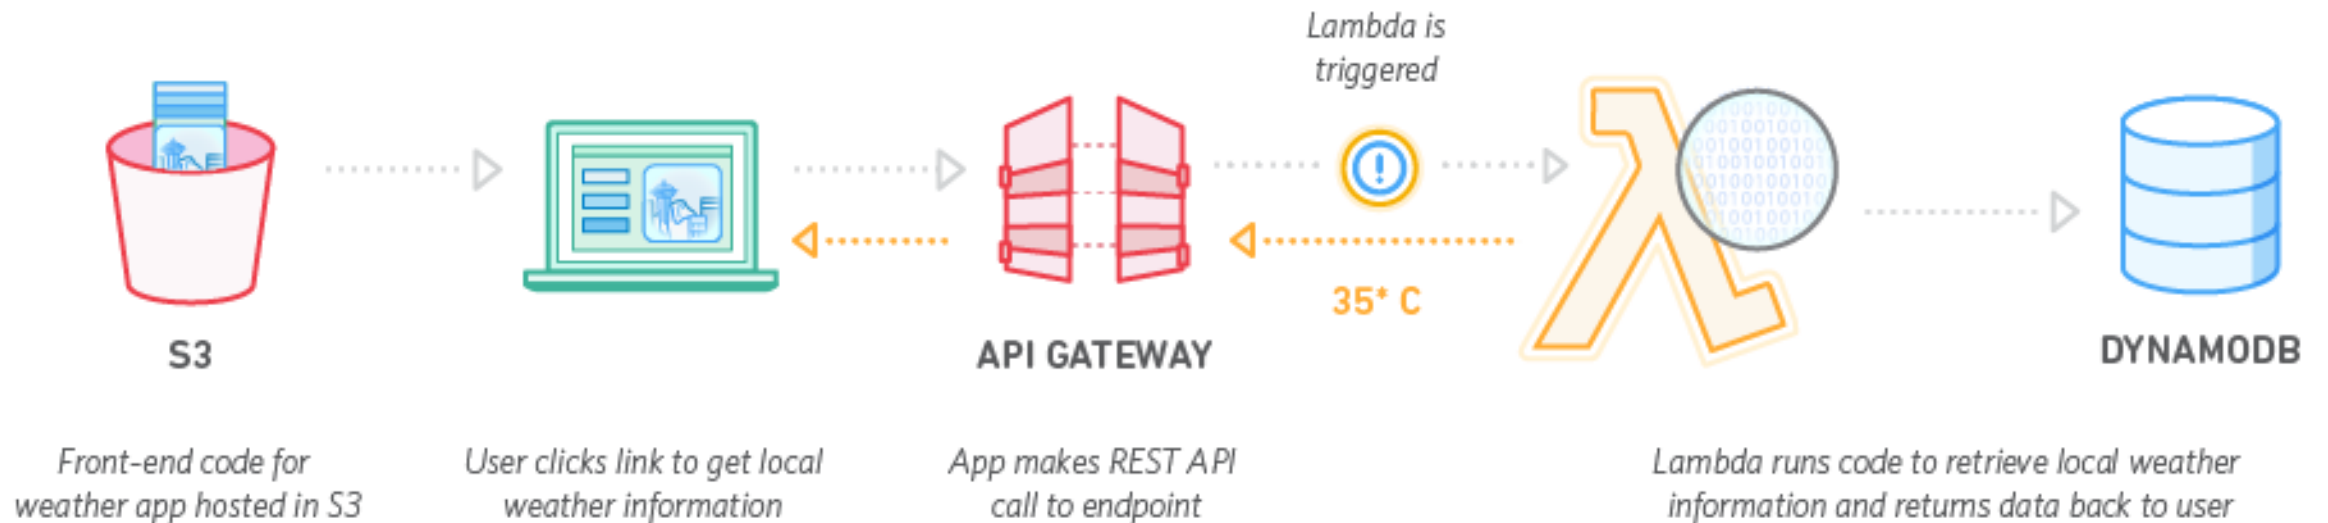

**[What is FaaS (Function-as-a-Service)?, IBM Cloud]**

# EXEMPLE D'ARCHITECTURE — AWS LAMBDA

## Example: Weather Application

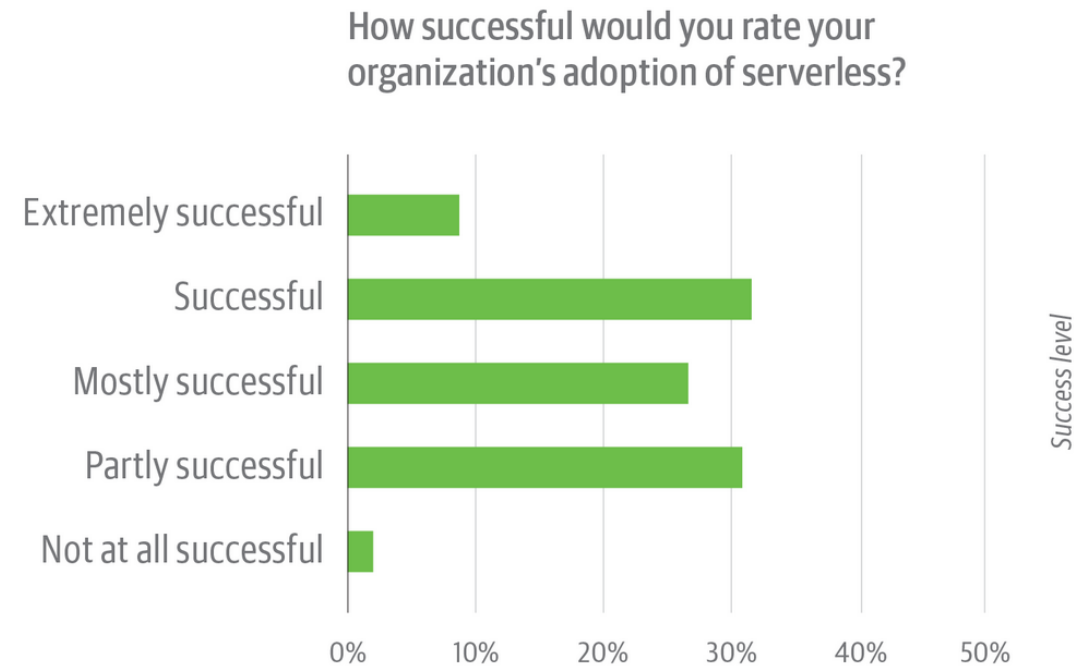

Source : AWS Lambda

# AVANTAGES

- réduction des coûts d'exploitation ('pay-as-you-go')
- mise à l'échelle automatique
- absence de problèmes liés aux maintenances de serveur
- augmentation de la productivité des développeurs (déploiement rapide)

# DÉFIS

- formation du personnel actuel
- verrouillage des fournisseurs (portabilité)
- difficulté des tests d'intégration/débogage
- coûts imprévisibles/variables
- sécurité (dépendance du provider)

Source : O'Reilly

# III. MÉTHODES ET OUTILS DE VEILLE

# SOURCES & PARTAGE

- **Cloud computing : la lourde tendance 2020, le "serverless" progresse**, ZDNet
- **Serverless explainer: The next generation of cloud infrastructure**, NETWORK WORLD
